Professional Summary

Unity Game Developer with 3 years of experience building hyper-casual and hybrid-casual 2D/3D mobile games. Proficient in gameplay programming, monetization systems (IAP, Ads), Firebase A/B testing, and creative collaboration. Known for delivering clean code, polished mechanics, and optimized performance across multiple titles.

Experience

Unity Game Developer - Amgo Games (August 2023 - Present)

Developed core gameplay systems and mechanics for hyper-casual and hybrid-casual titles.

Built ad creatives for top-trending games including Hexa Tap, Sort Dash, and Coin Sort.

Delivered 10+ Unity projects including published titles such as Lie Detective, Trainscapes, and Block Match.

Created a dynamic train-sorting system in Trainscapes using Sebastian Lague's Bezier Path, including tap-to-move logic

Integrated monetization systems including Unity Ads (rewarded/interstitial), IAP, and Firebase Remote Config for A/B testing.

Optimized runtime performance and reduced memory overhead using the Unity Profiler, object pooling, and static/dynamic batching to ensure stable 60 FPS on lower-end mobile devices.

Projects

LieDetective (2D Puzzle Game) (Playstore)

Designed logic-based levels and built tap-to-proceed gameplay. Used ScriptableObjects for challenge flow and data-driven design.

Block Match (2D Puzzle Game) (Playstore)

Developed drag-and-drop mechanics, scoring systems, combo feedback, and transitions using DOTween.

Trainscapes (3D Sorting Game) (Playstore)

Implemented train pathing and sorting with Bezier Path. Handled performance optimizations and integrated monetization systems.

Triple Category Match (2D Match Game) (Playstore)

Engineered a 2D puzzle game and built a custom Level Editor tool that streamlined the level-generation pipeline for designers.

Technical Skills

Game Development: Unity, C#, 2D/3D Gameplay, ScriptableObjects, DOTween, Timeline, Animator, NavMesh

Monetization: Unity Ads, Unity IAP, Firebase Remote Config, A/B Testing

Optimization: Object Pooling, Static/Dynamic Batching, Unity Profiler

Programming Languages: C#

Workflow & Tools: Git, GitHub, PlayerPrefs, Custom Inspector Tools, UI Animation

AI Tools: Antigravity, Claude

Education

Unity Game Development - Brototype (2022 - 2023)

Bachelor of Science in Electronics - University of Calicut (2019 - 2022)
